NEW YORK — Garvey|Simon is pleased to announce SELECT 2026, the eleventh annual exhibition of emerging and mid-career artists chosen through the gallery's innovative Artist Discovery Program. Bringing together ten artists working in painting, collage, works on paper, and sculptural forms, the exhibition will be on view at DFN Projects, 41 East 57th Street, 11th Floor, from November 11 through December 31, 2026.

Garvey|Simon established the Artist Discovery Program in 2016 in direct response to a persistent obstacle facing artists: the scarcity of opportunities to approach dealers and have their work considered. At a time when many galleries discourage unsolicited submissions, the program offers a direct channel for artists to introduce their work for review, without requiring a personal introduction or an existing connection to the gallery.

Now in its eleventh year, SELECT demonstrates what this approach can make possible. The ten participating artists represent diverse practices, materials, and subjects, brought together through their individual relationships to Garvey|Simon's interests and aesthetic sensibility. The program's continuing dialogue with artists has led to lasting partnerships and subsequent solo and group exhibitions with the gallery.

SELECT 2026 will also be available online through Artsy. Selected works will remain on view by appointment at the Garvey|Simon viewing space through March 31, 2027.
